

PROVING PERFORMANCE

DOOR DEFENDER™

THE BACKGROUND

The Door Defender™ Protection System has a rugged outdoor-grade polyethylene construction featuring a patented bumper profile that acts as a spring to absorb door impacts and Holland's trusted nylon buttons. Its "one size fits all design" simplifies use from installation and training to inspection and maintenance. Door Defender™ is also entirely waterproof and has been impact-tested to meet or exceed 10+ year field usage in conditions as harsh as -40° F and +130° F. Simply put, Door Defender™ is the best protection product of its kind and saves you time and money.

THE STATS

- Holland Inspected 40 cars with Door Defender™ between March and May 2023
- Car certification dates ranged from 2016-2022
- Inspected systems were like "Day 1," with just one button missing across all cars.
