

TRACK INSPECTOR SERVICE

How well do you know your track? Most railroads and Industrial tracks change regularly through the seasons of weather creating defects that need attention. Regularly scheduled annual testing can save you 10-20% in your annual maintenance budget by organizing repairs on a priority basis and preventing derailments.

TRACK INSPECTOR

IT'S READY, SET ON AND TEST

with Holland's Track Inspector equipped with our Argus® Track Measurement Technology Using your vehicle, you can save cost and see track changes with this adaptable geometry testing system. Usable under any conventional hi-rail vehicle with any 2" or 2 ½" square trailer hitch receiver, this system is adaptable to your unit in less than an hour for the initial set-up and 10 to 15 minutes thereafter.

TRACK INSPECTOR SERVICE FEATURES

- Full Geometry System
- Able to be mounted, configured, and calibrated by one person in less than an hour
- Lower cost with daily rate pricing
- Wireless connection between Argus® system and an onboard tablet
- Includes a quick set up encoder and GPS to measure, mark and record your track data
- Powered through a vehicle's standard trailer 7-pin trailer light plug using your vehicle as the power source
- Same professional data reporting provided by our larger TrackSTAR units

TRACK INSPECTOR AVAILABLE FOR PURCHASE IF FREQUENT TESTING IS NEEDED WITH QUARTERLY OR MONTHLY TESTS
